Continuous Inkjet Printers: The Ax-Series

Speed, accuracy, and the ability to perform in tough and varied environments give the latest Domino Ax-Series Continuous Inkjet (CIJ) Printers unique technological advantages. An industry breakthrough, our new generation of ink drop technology gives you gains in ink usage, droplet accuracy, and placement at traditional print speeds. Our revolutionary i-pulse system allows you to rapidly print high-contrast, durable messages and multiple lines at high speeds.

Quite simply, CIJ printing technology is one of the most frequently chosen coding solutions. It is fast, durable, designed to be easy to operate, flexible to install and, best of all, is extremely versatile: it can print on virtually any surface. With over 35 years of experience, Codico is an expert in Codico, Marking, Labelling and Automation technology.

Key Benefits

- 316 stainless steel for harsh washdowns
- Easily configurable
- increased productivity
- Service-free and error-free

Ax550i

Precision and flexibility from a printer that handles harsh environments

For coding in harsh and more demanding environments, Domio's most advanced CIJ printer - the Ax550i - comes in a tough package. Its robust and stackable cabinet is made from marine grade 316 stainless steel, which is not only dust-tight but - with an IP66 rating - can also withstand washdowns, high-pressure water blasting and chemicals used during heavy-duty cleaning.

Ax550i

The Ax550i's range of printheads includes the i-Pulse RS printhead, which offers high levels of durability and hygiene. The extensive i-Pulse ink range includes MEK-free and highly-pigmented options, as well as specialised inks for direct food contact, steilisation, wet glass bottles, and many more industry-specific requirements. The powerful Ax550i benefits from the i-Techx electronics platform and provides a class-leading user experience on a range of touchscreen sizes.

Ax550i

The Ax550i is fully compatible with Industry 4.0 standards, with Domino Cloud, and Domino Automation systems and third-party production systems - all with the aim of empowering production team members to drive improvements through remote diagnostics and monitoring. Domino's top of the range CIJ printer, the Ax550i is ideally suited to high-end beverage, food, and consumer goods product and packaging applications.

Ax550i Key Benefits

- **Smooth Integration**- Supporting leading industrial communication protocols simplifying installation and automation on-line
- **Increased Productivity** - Precision ink drop generation eliminates downtime on your production line
- **316 Stainless Steel For Harsh Washdowns** - Designed for demanding applications
- **i-Pulse Printheads and Ink** - Precision ink drop generation for high-resolution printing
