## Business Insights To Keep You One Step Ahead

Seconds of downtime means lost revenue. Consequently, streamlining operations has become an absolute necessity. Domino Cloud can help you to protect your products and keep your line moving - giving you the analytics and system alerts to reduce servicing costs and increasing efficiency from product to pallet.

# How Does It Work?

Your printer performance diagnostic information will be sent via a safe and secure connection to the Domino Cloud – which is viewable anywhere or anytime via the Domino Customer Dashboard
This new industry-leading technology provides comprehensive support for Domino printers located around the globe. The active remote monitoring, means you'll always be on-hand to detect problems long before they lead to downtime.

# Key Benefits

**Improved Productivity** - You will be alerted when faults are detected, or replacements are needed to achieve optimal uptime on your production line.

**Production Analysis** - Print statistics are easily available and understandable for you to use for overall equipment efficiency.

**Planned Maintenance** - By knowing when maintenance or intervention is needed you can plan production line intervention in advance.
