Eliminate Errors with a Code Verification System

The R-Series is the smart code verification system range from Domino, created and optimised to work with our wide range of solutions. Now it is easier than ever to check every code and detect any issues before they have an impact on your production processes.

The R-Series eliminates labour-intensive manual inspections, reduces the amount of scrap, and helps to avoid the expense and brand damage associated with product recalls.

Key Benefits

Coding and code inspection from the same supplier? It just makes sense!

- **Code with confidence** - Ensure readability of every code
- **Protect your brand** - Avoid regulatory/retailer penalties
- **Eliminate scrap** - Avoid potential costs associated with scrap and recalls
- **Automate code verification** - Eradicate costly manual inspections
